Dear Mr. Bruno:

re: The Angel of Water Device

I'm still amazed at the rarity of how we entered into each other's lives. After reviewing more than fifty other devices for cleansing the colon, Blake Gastroenterology chose your company. The style and the well thought out operational/maintenance is ingenious. We have no regrets.

Being a gastroenterologist made it a challenge to enter into this realm of service. My colleagues and I have held such services in disdain, forever. I'm now convinced otherwise. The Angel of Water is helping to do just what I envisioned it would do, help save lives in all communities.

I Suspect my colleagues will eventually come to appreciate this method of preparation for the colonoscopy as well; and some frequency of colon cleanse for wellbeing purposes also. I look forward to a long relationship. Please feel free to share my endorsement with others.

Best Regards,

J. Steven Blake, D.O., M.Sc., FACOI
