

Modern ergometer with multifunctional applications

Highlights

High standards

Lode is a socially and environmentally responsible company. All Lode products are RoHS/WEE compliant and Lode is ISO 9001:2003, ISO 13485:2008 and FDA 510K certified. All medical products comply to MDD 93/42/EEC, incl. IEC 60601-1.

Easy to operate

For Lode products this means:

- easy to connect
- easy to move around
- easy user interface

Reliable and reproducible stress tests

The experience of professionals who calibrate many ergometers shows that the Lode ergometers are the most reliable across the complete workload and rpm range and still within specifications even after many years of intensive use.

Multifunctional

The ergometer can be used in various ergometry settings, enabling a multifunctional deployment.

Additional features with PCU

Besides the possibility to program 24 protocols easily, this control unit offers the following features:

- better monitoring because of the additional and larger display

- a perfect combination with BPM
- possibility to measure SpO2

Modern ergometer with multifunctional applications

In this system, the Angio is fixed to the wall. Handgrips are standard included. The Angio is an ergometric unit that can be used for both arm and supine ergometry. Its compact design makes it universally applicable for ergometric studies in those sectors in which standard ergometry cannot be used. The Angio operates independent of pedaling speed in the range of 7 - 1000 watt. The Angio rehab is standard supplied with a 7" control unit with touch screen. Thanks to the built-in network module, the ergometer can be connected to the Lode Cardiac Rehab Manager Software, Lode Rehab Manager or the Lode Ergometry Manager.

Features

Accurate over a long period of time

The Lode ergometers are supplied with an electro-magnetic braking mechanism of Lanooy (eddy current). The biggest advantage of this braking system compared

to a friction braking system is the absolute accuracy and the accuracy over time. Moreover, friction braking systems have more wearing parts.

Extreme low start-up load

The extreme low start-up load of 7 watts and the adjustability in small steps of 1 watt make this ergometer perfectly suitable for many different applications. The standard control unit shows multiple ergometry parameters and you can determine your specific default setting and start-up menu.

Small adjustment steps

The workload of the Lode ergometers is adjustable in steps of only 1 watt. Depending on your wishes, the test operator or the test subject can adjust the workload. The steps of 1 watt are possible in the manual mode as well as within protocols.

RS232 connectivity

RS232 ports enable connectivity to most ECG and ergospirometry devices as well as PC's.

LEM compatible

This product can be used with Lode Ergometry Manager (LEM) software to manage data and to apply specific protocols when a Communication card or Network card is present

LCRM compatible

This product can be used with Lode Cardiac Rehabilitation Manager software (LCRM)

Versatile controls

Additional features with PCU Besides the possibility to program 24 protocols

easily, this control unit offers the following features:

- better monitoring because of the additional and larger display

- a perfect combination with BPM
- possibility to measure SpO2

Versatile Interfacing

Various interface protocols guarantee perfect communication with all commonly known stress ECG and spirometry equipment

Modern ergometer with multifunctional applications

Interconnectivity between Lode products

Connecting Lode products has never been easier! Lode rehab and sports products have a standard Network card:

- To be able to connect the first product to the PC with L(C)RM a Lode proprietary network to PC cable is needed (#930930).

- From the second product onward products can be connected to the previous one, creating a bus network configuration;

- The last product always needs a termination plug to avoid interference and loss of data. Therefore all products with such a network card come with a termination plug.

Benefits

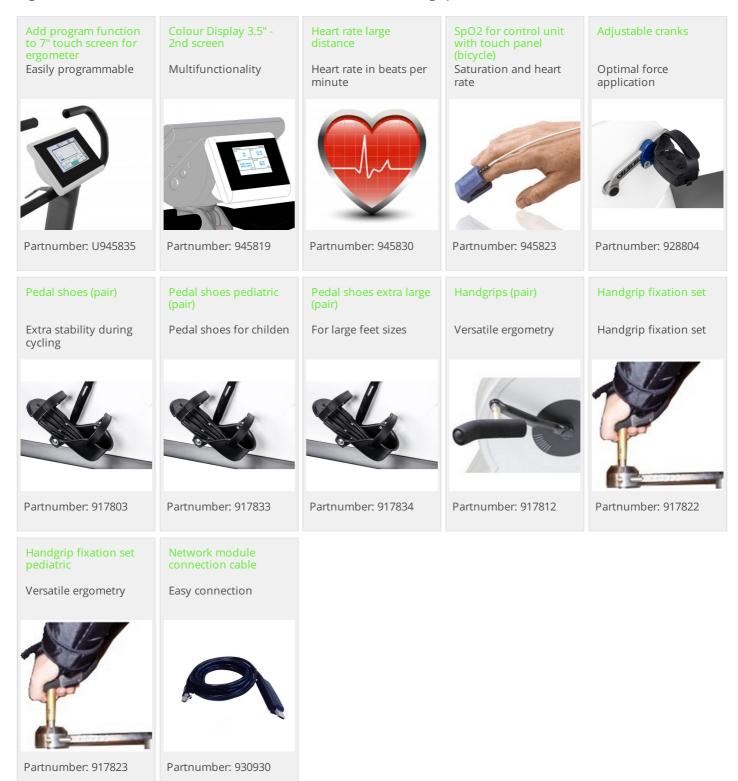

- Lossless data connection
- High bandwidth
- No interference of COM ports
- Daisy chain connection
- Full access of all data in the product to LCRM

Modern ergometer with multifunctional applications

Angio rehab - with Static Wall Fixation can a.o be extended with the following options:

Modern ergometer with multifunctional applications **Specifications**

Specifications	
Workload	
Minimum load	7 W
Maximum peak load	1000 W
Minimum load increments	1 W
Maximum continuous load	750 W
Hyperbolic workload control	\checkmark
Linear workload control	\checkmark
Fixed torque workload control	\checkmark
Maximum rpm independent constant load	150 rpm
Minimum rpm independent constant load	30 rpm
Optional heart rate controlled workload	\checkmark
Electromagnetic "eddy current" braking system	\checkmark
Accuracy	
Workload accuracy from 7 to 100 W	3 W
Workload accuracy from 100 to 500 W	3 %
Workload accuracy from 500 to 1000 W	5 %
Jser Interface	
Readout Distance	\checkmark
Readout RPM	\checkmark
Readout Heartrate	\checkmark
Readout target HR	\checkmark
Readout Energy	\checkmark
Readout Torque	\checkmark
ReadoutTime	\checkmark
Readout Power	\checkmark
Set Display	\checkmark
Set Resistance	\checkmark
Set P-Slope	\checkmark
